

Unit 1 - Section 1-6 - Pairs of Angles

Angle Pairs

1. Vertical Angles

ALWAYS =

ALGEBRA SET-UP

2. Adjacent Angles

* Common side (Share)

* Common vertex

* Cannot overlap

NOT Adjacent

NOT Adjacent

overlapping

3. **Complementary Angles** → 2 angles that add to = 90°

OR

Algebra Set-up

$$\square + \square = 90^\circ$$

4. **Supplementary Angles** → 2 angles that add to = 180°

OR

Algebra Set-up

$$\square + \square = 180^\circ$$

5. **Linear Pair** - 2 adjacent angles that form a line.

* Must be adjacent

* add to = 180°

perpendicular → forms 90° angles

p.49 MP

#5

Complimentary

$$(4x-2) + (9x+1) = 90^\circ$$

$$x = 7$$

$$m\angle LMN = 26^\circ$$

$$m\angle PQR = 64^\circ$$

p.49 MP #1

Complimentary

$$\angle FGK \text{ and } \angle LKG = 90^\circ$$

41 + 49

Supplementary

$$\angle HGK \text{ and } \angle LKG = 180^\circ$$

131 + 49

Adjacent

$$\angle HGK \text{ and } \angle FGK$$
